Visalia, CA 93291  
(559) 623-0451  
rbrady@tularecog.org

### TJKM Fee:

\$100K

### PROJECT DESCRIPTION:

TJKM is responsible for the data collection and analysis related to the potential for short and long-term improvements to transit service in Tulare County over the next 25 years.

TJKM surveyed stakeholders and recommended investments in technology enhancements that would directly benefit transit users, which can attract new riders and benefit existing riders. Investment in the fare collection system, real-time bus arrival information and implementing transit signal priority technologies were among these recommendations.

Tasks also included evaluating premium transit service, inter-county service, and will entail scenario modeling to assess the varying travel demand characteristics that result from four scenarios developed by the prime consultant. TJKM developed a Concept of Operations Plan that will be utilized by transit providers throughout the County as they introduce various ITS elements to their transit infrastructure in the coming years.

VISION THAT MOVES YOUR COMMUNITY
