TJKM FEE:
\$250K

PROJECT DESCRIPTION:

TJKM is under a current on-call agreement with the City of Redwood City. Activities under this contract include:

- **Reviewing Traffic Impact Studies**
Review traffic analysis, evaluate proposed mitigations, and review TDM plans; attend public meetings (e.g. City Council, Planning Commission) and answer questions.
- **Providing Construction Traffic Control Plan Review/Input**
Define time restrictions for street and lane closures on each affected street based on hourly traffic volumes, adjacent land uses, and potential impact on detour routes; review specifications for provisions to optimize public safety, minimize public inconvenience, and provide emergency access; review draft lane closure plans for major city street trench crossings.
- **Providing On-Call Traffic Engineering Support**
For two days per week, TJKM is providing on-site assistance with the traffic calming and parking restriction citizen requests, reviewing proposed traffic calming devices, pedestrian crossing signals, and stop sign installations.
- **Providing Regional Transportation Planning Support**
Represent City to assist coordination with other agencies on regional projects; technical support, meeting participation.
- **Preparing Grant Applications**
Field review locations of proposed bicycle and pedestrian facilities, prepare conceptual plan drawings and cost estimates. Assemble relevant information and present in required grant application format. Present proposed project and benefits to evaluation committee.

VISION THAT MOVES YOUR COMMUNITY
